

WORKING STUDENTS WANTED!

Become a part of our Meshcloud-Team!
(Location Frankfurt Ostend)

Apply
NOW!

meshcloud

You are a quick learner and eager for knowledge?

You enjoy working in a team just as much as working independently?

You take responsibility for your tasks?

You express your opinion openly but respectfully and be open to constructive criticism?

You have the unconditional will to always improve yourself?

Then you fit in perfectly with us!

That's what you can expect from us:

Insights into the most exciting and latest cloud technologies on the market

Responsible tasks that actively promote the growth of the company

Gain experience in a very agile and lively working environment

Promotion of your commitment and fast career opportunities

A young, talented and motivated team with new solutions and creative ideas

Working student Development

Would you like to participate in the further development of the Meshcloud platform? You can expect tasks in the area of frontend and backend development. We work with Angular, TypeScript, Kotlin and Spring Boot. If you have Java knowledge, you will quickly get along with Kotlin and realize its efficiency. Send us your application including project references (Github) and your Stackoverflow profile to jobs@meshcloud.io.

Working student DevOps/Admin

Are you fascinated by the automation of infrastructure? As a working student in DevOps you build automation with tools like Docker, Kubernetes and Terraform. You should already have some experience with cloud technologies, Bash or Python and Linux. We look forward to receiving your application at jobs@meshcloud.io.
