

One Platform. All Clouds.

Large organizations use meshcloud to deliver secure cloud environments to thousands of DevOps teams, while maintaining control and reducing complexity.

Profit in every phase of your Cloud Journey

Direct, cloud-native access to multi-cloud resources

Consistent security over the entire cloud landscape with Landing Zones & Policies

End-to-end Billing and transparent cost allocation

Service Marketplace for provision of managed services

Measurable benefits for all Cloud Stakeholders

80 %

faster

DevOps-Teams are supported by automation of administrative processes and the availability of security standards, relieving their burden and maximizing productivity.

100 %

of use cases covered

Cloud Foundation Teams receive tools with which they can conveniently and scalably provide and bill cloud-native environments and maintain continuous compliance.

100 %

of costs allocated

CIOs gain comprehensive transparency on the progress of cloud transformation and cloud costs. Uniform administrative processes for all clouds accelerate the cloud journey and save costs in the long term.

Who is meshcloud aimed at?

As specialists for scalable cloud governance, meshcloud is aimed at large companies with complex IT infrastructures. Leading organizations from the banking, automotive, energy and retail sectors are already successfully using the mesh-cloud platform to orchestrate their cloud environments.
